

DAS 703/Geographic Information Systems/Term I 2024-25/T1-24-25-DAS 703 [#254]

Ananthula Harshith Reddy [IMT2022023] - ananthula.reddy@iiitb.ac.in

Test Start Time	12/3/2024, 9:00:00 AM
Marks Scored	52.0 / 60.0
Total Questions	9
Attempted Questions	9
Correct Questions	9
Incorrect Questions	0
Skipped Questions	0
Pending Evaluation	0

Answer Key

No answer key available for this test. Please contact your exam division/cell.

4. The band width of the region =  $400 - 900 \text{ nm}$   
=  $500 \text{ nm}$ .

\* The instrument carries 228 bands with spectral res of 1.8nm.

$$= 228 \times 1.8 \text{ nm}^2$$

$$= 410.4 \text{ nm}$$

$\therefore$  as  $410.4 < 500$  we can say that there will be no spectral overlap b/w the bands

Q. low pass filter

~~$$[5 \times 5] \text{ filter} = \frac{1}{9}$$~~

### High pass filter

~~$$[5 \times 5] \text{ filter} = \frac{1}{24}$$~~

4. You are a Space Scientist. You have to design a Hyperspectral Scanner sensitive to radiation in the 400 to 900 nm region of the electromagnetic spectrum. The instrument will carry 228 bands with spectral resolution of 1.8 nm. Does this configuration result in spectral overlap between the bands?

5. Explain the "Image" shown in Figure 4 with respect to *sub-pixel classification* with reference to the "Terrain". Discuss a possible solution to the problem.

Figure 4.

Evaluator Comments

Not Explained Linear mixture model along with equations nd constraints.

---	-------------	---	-----	-------------

6. What is attribute accuracy in satellite image classification? Explain Omission error, Commission error, Producers accuracy, Users accuracy and Overall accuracy using a sample error matrix.

Evaluator Comments

Overall accuracy missed.

-------	---------	--------	-------

1	File Upload	✓	8.0	Hide Answer
---	-------------	---	-----	-------------

7. What is Geocoding? Why is it required? How is georeferencing done? What are the different resampling techniques?

Evaluator Comments

requirement of geocoding has not been given, still 0.5 marks have been awarded.  
apart from that, ans is well written

0

Marks per question : 5.0

Marks Scored : 3.5

Q No.	Q. Type	Status	Marks
-------	---------	--------	-------

1	File Upload	✓	3.5	Hide Answer
---	-------------	---	-----	-------------

8. Define coefficients of a 5 x 5 low and high pass filter with applications.

Evaluator Comments

matrix of low and high pass filter are totally wrong, still only half half marks have been cut. and also applications are not relevant to gis, you should have written in construct of gis uses. so half marks have been deducted.
